PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience building production web applications and distributed backend systems on React.js, Node.js, MongoDB, and MySQL. I design REST APIs and microservices, run background-job and search pipelines (BullMQ, Redis, Elasticsearch), and ship payment and third-party integrations. I also build LLM-powered features and use AI tooling to deliver faster. Looking for a high-impact Software Engineer role on a product team.

WORK EXPERIENCE

Frontend Developer Intern · **Bridgeness Technologies Pvt. Ltd. (Reelax)** Noida, India · Jul 2023 – Dec 2023

- Developed and styled modular, responsive UI components using **React.js**, **Redux**, and **CSS3** for brand discovery and creator dashboards.
- Integrated RESTful APIs with frontend views and managed asynchronous state using **Redux Toolkit**.
- Collaborated with senior engineers on code reviews, bug fixes, and performance optimization across browsers.

Software Engineer · **Bridgeness Technologies Pvt. Ltd. (Reelax)** Noida, India · Jan 2024 – Present

- **Reelax-platform:** Build and maintain the **React.js/Redux** frontend and **Node.js/Express** backend of an influencer-marketing platform for discovery, campaigns, contracts and payouts, resulting in **25% more engagements**.
- **Spotlyt Campaign Platform:** Shipped **60+ REST APIs** for campaign lifecycle management, tier-based pricing, AI creator matching and analytics.
- **Approval Workflow:** Built a multi-step submit → review → approve/reject → rework flow with WhatsApp and email notifications.
- **Backend & Search:** Designed microservices on **MongoDB** and **MySQL** for campaign processing and payouts, deployed on **GCP** and **Azure**, with **BullMQ/Redis** pipelines and **Elasticsearch**-backed creator discovery.
- **Payments & Integrations:** Integrated **Razorpay** and **Cashfree** with JWT-based authentication, plus Instagram Graph API Comment-to-DM automation, Giddh and Zoho.
- **Engineering:** Debug production issues and tune performance across the stack; use **Cursor** and **ChatGPT** to speed up API and feature delivery.

PROJECTS

Swiggy Web Clone · **React.js, Vite, Live Swiggy API, Cloudinary CDN** github.com/harshvgupta1/React

- Engineered a responsive food-ordering platform integrating **Swiggy's live public API** via a Node/Vite reverse proxy to bypass browser CORS, handling city coordinates, Cloudinary CDN imagery, and resilient offline fallback caching.
- Implemented real-time debounced search, multi-facet diet/rating filters, category carousels, categorized menus with interactive cart quantity steppers, coupon discount logic, and a live order tracking timeline modal.
