PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing, building, and shipping production web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js). Currently building Reelax - an influencer marketing platform - across brands web, admin tools, core APIs, and background microservices. Strong in REST APIs, third-party integrations, AI automation, performance optimization, and Agile collaboration.

WORK EXPERIENCE

Full Stack Developer

Jan 2024 - Present

Bridgeness Technologies Pvt. Ltd. - Reelax (getreelax.com)

- Build and maintain responsive full-stack applications with React.js, Node.js, Express.js, and MongoDB for the Reelax influencer marketing platform.
- Own features across brands SPA (brands.getreelax.com), admin console, core REST APIs, and async microservices for Instagram/YouTube sync.
- Implemented Prompt AI to generate automated scripts and task-specific instructions for product workflows.
- Integrated Giddh Accounting API for invoicing, purchase orders, and financial record automation.
- Built Instagram Graph API Comment-to-DM automation to improve influencer engagement.
- Integrated payments and commerce flows (Razorpay/Cashfree), JWT auth, Redis queues (BullMQ), and Elasticsearch-powered search.
- Optimized frontend/API performance for faster load times and better UX; collaborated with design and engineering on pixel-perfect responsive UI.
- Streamlined Git workflows and contributed to scalable architecture, reducing maintenance effort.

KEY PROJECTS

Reelax Brands Platform

[React](#), [Redux](#), [JavaScript](#)

Brand-facing SPA for influencer discovery, campaigns, marketplace, analytics, contracts, and subscriptions. Live: brands.getreelax.com

Reelax Core API
