# HARSH VARDHAN GUPTA

Software Engineer | MERN · Next.js · TypeScript | Cloud Architecture & CI/CD

Noida, India • +91 7905775453 • harsh872000@gmail.com • LinkedIn • github.com/harshvgupta1

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Web Design
**Backend & APIs:** Node.js, Express.js, RESTful APIs, Microservices Architecture, JWT Authentication, BullMQ, Redis Caching
**Databases & Search:** MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Connection Pooling, Query Optimization
**Cloud & DevOps: GCP (Cloud Run, Cloud SQL, Cloud Build, Artifact Registry)**, **Docker**, **CI/CD Pipelines (GitHub Actions & Cloud Build)**, Azure, Git/GitHub
**AI & Modern Tools: Google Gemini API**, OpenAI/LLM APIs, Prompt Engineering, Postman, Cursor, Chrome DevTools, Agile / Scrum
**Core Fundamentals:** Data Structures & Algorithms (DSA), System Design, Object-Oriented Programming (OOP)

## WORK EXPERIENCE

**Software Engineer** | **Bridgeness Technologies Pvt. Ltd. (Reelax), Noida** Jan 2024 – Present

- Built and maintained core frontend modules for the Reelax influencer marketing platform (creator discovery, campaign lifecycles, contracts, payouts); engineered analytics dashboards with debounced search and Redis caching, driving a **25% increase** in platform engagements.
- Architected responsive web dashboards for the **Spotlyt** campaign platform utilizing Next.js and TypeScript, handling dynamic tier-based pricing models, multi-step approval tracking, and AI creator matching interfaces.
- Designed distributed backend microservices on MongoDB and MySQL deployed on GCP; engineered high-throughput BullMQ/Redis background task queues and an Elasticsearch-backed discovery engine supporting **100K+** creator profiles.
- Integrated payment gateways (Razorpay, Cashfree) with secure JWT authentication and financial integrations (Giddh, Zoho); engineered Instagram Graph API Comment-to-DM automation and multi-channel notifications.
- Integrated OpenAI/LLM APIs for automated creator categorization and matching; systematically profiled production APIs, reduced query latency, and debugged issues across frontend, server, and data layers.

**Frontend Developer Intern** | **Bridgeness Technologies Pvt. Ltd. (Reelax), Noida** Jul 2023 – Dec 2023

- Developed modular, mobile-first UI components and brand-discovery dashboards using React.js and CSS3, managing complex client-side state with Redux Toolkit and REST APIs.
- Collaborated with senior engineers on code reviews, sprint delivery, and performance profiling; audited Core Web Vitals to optimize client-side rendering and ensure cross-browser consistency.

## FEATURED PROJECTS

**AI Resume Screener & Job Tracker (Full-Stack & Cloud Native)** GitHub Code

*Next.js 16 (App Router), TypeScript, Node.js, Express, MySQL (GCP Cloud SQL), Google Gemini API, Docker, GCP Cloud Run, CI/CD*

- Architected an end-to-end full-stack platform that parses candidate resumes (PDFs) and evaluates them against target job descriptions using Google Gemini 1.5 Flash API to compute ATS match scores, missing keyword analysis, and actionable resume revisions.
- Engineered an automated **CI/CD pipeline** integrating GitHub and **GCP Cloud Build**: every git push to the `main` branch triggers containerized Docker builds and automated zero-downtime serverless deployments to **GCP Cloud Run**.
- Configured **GCP Cloud SQL (MySQL)** with connection pooling and schema migrations, persisting resume text, structured JSON match evaluations, and an interactive Kanban application pipeline.

**Swiggy Web Clone** GitHub Code

*React.js, Vite, Live Swiggy API, Cloudinary CDN, Tailwind CSS, Custom Hooks*

- Built a responsive food-ordering application consuming Swiggy's live API through a custom Node/Vite reverse proxy to prevent CORS issues; integrated Cloudinary CDN for responsive imagery.
- Implemented debounced real-time search, cuisine filters, category carousels, dynamic cart calculations with coupon logic, and an order timeline with local storage persistence.

## KEY HIGHLIGHTS & METHODOLOGIES

- **Production Scalability:** Extensive experience engineering scalable web systems, database connection pooling, and microservices supporting 100K+ production entities.
- **Agile & GitOps:** Strong proficiency in Git-based collaborative workflows, sprint planning, Docker containerization, and continuous deployment (CI/CD) pipelines.
- **Languages:** English (Full Professional Proficiency), Hindi (Native).

## EDUCATION

**B.Tech in Electronics & Communication Engineering** | Lakshmi Narain College of Technology & Science, Bhopal **CGPA: 8.33 / 10** | 2019 – 2023
